in biochemistry, particularly in the areas of structural biology and bioinformatics. It provides a solid biochemical foundation that is rooted in chemistry to prepare students for the scientific challenges of the future. New information related to advances in biochemistry and experimental approaches for studying complex systems are introduced. Notes on a variety of human diseases and pharmacological effectors have been expanded to reflect recent research findings. While continuing in its tradition of presenting complete and balanced coverage, this Global Edition includes new pedagogy and enhanced visuals that provide a clear pathway for student learning.

The "Gold Standard" in Biochemistry text books, Biochemistry 4e, is a modern classic that has been thoroughly revised.

Don and Judy Voet explain biochemical concepts while offering a unified presentation of life and its variation through evolution. Incorporates both classical and current research to illustrate the historical source of much of our biochemical knowledge.

This comprehensive introductory text thoroughly explains basic biochemical concepts while offering a unified presentation of the field and its development. Emphasizes biochemistry as a body of knowledge compiled through experimentation; stresses the unity of life and its variation through evolution and the ways in which biological processes are organized into interdependent networks. Also examines medical applications of biochemical knowledge, identifying some of the major contributors to the field and approaches they have taken to solve

important biochemical puzzles. Contains excellent art, carefully planned for pedagogical impact, including illustrations by Irving Geis. Current, extensive references and creative problem sets are also included.

This book is an outgrowth of my teaching of biochemistry to undergraduates, graduate students, and medical students at Yale and Stanford. My aim is to provide an introduction to the principles of biochemistry that gives the reader a command of its concepts and language. I also seek to give an appreciation of the process of discovery in biochemistry.

CD-ROM includes animations, living graphs, biochemistry in 3D structure tutorials.
