The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components.

Larson's ALGEBRA AND TRIG is ideal for a two-term course and is known for delivering sound, consistently structured explanations and carefully written exercises of mathematical concepts. Updated and refined through learning design principles, the 11th edition removes barriers to learning and offers a carefully planned and inclusive experience for all students. New Review & Refresh exercises prepare students for each section and provide a general skill review throughout the text. How Do You See It? exercises give students practice applying the concepts, and new Summarize features, and Checkpoint problems reinforce understanding of the skill sets to help students better prepare for tests. Larson 's learning support includes free text-specific tutorial support at CalcView.com and CalcChat.com. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This volume of original stories is all for furry feline friends. A unique collection of fantastical cat tales.

Ophelia Jensen's good witch granny Abigail revels in her paranormal powers. But Ophelia never asked for her bothersome psychic abilities -- especially since they proved worthless when the thirty-something librarian's best friend Brian was murdered by a still-unknown assailant. Now, five years later, another friend is gone, killed in almost identical fashion. Even dear old Abby isn't safe, distracted as she is by her fight to prevent a massive, mega-polluting pig-farming operation from invading their small Iowa town. And Ophelia can't count on her snarling, scoffing nemesis, police detective Henry Comacho, to get the job done, so she'll have to take matters into her own hands. Because a common thread to the crimes -- and a possible next victim -- is suddenly becoming troublingly apparent . . . and it's Ophelia Jensen herself!

228 reviews of sailboat designs. Reviews include detailed specifications on hull, accommodations and sailplans along with the frank, expert opinions of Robert H. Perry. Perry pulls no punches in his reviews in telling what's right and wrong with designs. Volume includes reviews of Small Boats, Cruising

Boats, Performance Cruising Boats, Racing Boats, and Multihulls. Indispensable reference.

This atlas presents normal and pathologic findings observed on CT angiography with 3D reconstruction in a diverse range of clinical applications, including the imaging of cerebral, carotid, thoracic, coronary, abdominal and peripheral vessels. The superb illustrations display the excellent anatomic detail obtained with CT angiography and depict the precise location of affected structures and lesion severity. Careful comparisons between normal imaging features and pathologic appearances will assist the reader in image interpretation and treatment planning and the described cases include some very rare pathologies. In addition, the technical principles of the modality are clearly explained and guidance provided on imaging protocols. This atlas will be of value both to those in training and to more experienced practitioners within not only radiology but also cardiovascular surgery, neurosurgery, cardiology and neurology.
